# 2022 Community Health Needs Assessment Health Profile Schuylkill County

# SCHUYLKILL COUNTY CHNA REPORT

Lehigh Valley Health Network (LVHN) is pleased to present our 2022 Community Health Needs Assessment (CHNA) Health Profiles. This report includes data and information about **Schuylkill County** and defines “community” as **all residents** living within the county. Within the communities LVHN serves, the CHNA reports place a greater emphasis on individuals who are experiencing health disparities or who are at risk for negative health outcomes as a result of social and environmental factors influencing their health.

The CHNA Health Profile examines factors that impact the health and wellness of the community. This includes social and environmental factors such as employment, education and air quality; individual behaviors like smoking or healthy eating; and the quality and availability of health care in the area. It includes secondary data from publicly available state and local sources such as the Centers for Disease Control and the Census Bureau. This data is used to identify the top health and social needs in our community and is then validated through community meetings and interviews with residents (primary data). When taken together, this serves as an important overview of the current state of health in our region and identifies potential areas of concern that Lehigh Valley Health Network can work to address.

The 2022 LVHN CHNA Health Profile is broken out into a number of subsections, including Demographics, Social and Economic Factors, Health Behaviors, and Health Outcomes. In addition, two types of call-out boxes are incorporated throughout the report. The first summarizes data presented on that page, providing easy-to-read summary statements. The second highlights findings from the community meetings and interviews.

Information in this Health Profile will be used to develop a three-year Implementation Plan, which outlines LVHN’s plan to address the needs identified. The 2022 Implementation Plan will be shared soon after the Health Profiles are released.

Community members and leaders repeatedly reported that transportation issues are a major barrier to accessing health care in the county. Because of county size and how dispersed people and services are, health care may be located far away. Outside of the more urban areas of the county, community members reported there are fewer community-based services.

36.46% of the population in Schuylkill County live in rural neighborhoods.

## URBAN AND RURAL POPULATION

This indicator reports the percentage of population living in urban and rural areas. Urban areas are identified using population density, count, and size thresholds. Urban areas also include territory with a high degree of impervious surface (development). Rural areas are all areas that are not urban. Of the report area's 148,289 population, 94,221 or 63.54% of the population is classified urban while 54,068 or 36.46% is rural.

## INCOME AND ECONOMICS

Economic and social insecurity often are associated with poor health. Poverty, unemployment, and lack of educational achievement affect access to care and a community's ability to engage in healthy behaviors. Without a network of support and a safe community, families cannot thrive. Ensuring access to social and economic resources provides a foundation for a healthy community.

# EDUCATION

This category contains indicators that describe the education system and the educational outcomes of report area populations. Education metrics can be used to describe variation in population access, proficiency, and attainment throughout the education system, from access to pre-kindergarten through advanced degree attainment. These indicators are important because education is closely tied to health outcomes and economic opportunity.

## ACCESS - PRESCHOOL ENROLLMENT (AGE 3-4)

This indicator reports the percentage of the population age 3-4 that is enrolled in school. This indicator helps identify places where preschool opportunities are either abundant or lacking in the educational system.

Report Area	Population Age 3-4	Population Age 3-4 Enrolled in School	Population Age 3-4 Enrolled in School, %
Schuylkill County	2,942	1,153	<b>39.19%</b>

## ATTAINMENT - BACHELOR'S DEGREE OR HIGHER

16.59% of the population age 25 and older, or 17,334 have obtained a bachelor's level degree or higher. This indicator is relevant because educational attainment has been linked to positive health outcomes.

Report Area	Total Population Age 25+	Population Age 25+ With Bachelor's Degree or Higher	Population Age 25+ With Bachelor's Degree or Higher, %
Schuylkill County	104,498	17,334	<b>16.59%</b>

31.19% of children age 3-4 are enrolled in preschool in Schuylkill County.

## ATTAINMENT – HIGH SCHOOL GRADUATION RATE

The adjusted cohort graduation rate (ACGR) is a graduation metric that follows a “cohort” of first-time ninth graders in a particular school year, and adjusts this number by adding any students who transfer into the cohort after ninth grade and subtracting any students who transfer out, emigrate to another country, or pass away. The ACGR is the percentage of the students in this cohort who graduate within four years. In the report area, the adjusted cohort graduation rate was 87.9% during the most recently reported school year. Students in the report area performed worse than the state, which had an ACGR of 88.3%.

Report Area	Adjusted Student Cohort	Number of Diplomas Issued	Cohort Graduation Rate
Schuykill County	1,434	1,261	<b>87.9%</b>
Pennsylvania	123,855	109,424	88.3%
United States	3,095,240	2,715,610	87.7%

### High School Graduation Rate by Student Race and Ethnicity

The table and chart below display local, state, and national variation in cohort graduation rates by student race and ethnicity.

Note: Data are suppressed for some school districts for population groups when the “universe” population falls below a certain threshold. County, state, and national summaries are aggregates of district level data and may not represent all students when suppression has occurred.

Report Area	Non-Hispanic White	Black or African American	Hispanic or Latino
Schuykill County	89.5%	86.2%	76.8%
Pennsylvania	92.4%	75.0%	74.9%
United States	90.8%	82.1%	83.7%

Community members and leaders in Schuykill County discussed the importance of early learning for later school success, but many participants shared that there are many barriers to accessing preschool services.

For many families, preschool is unaffordable. There are wait lists for good, safe preschools and a lack of resources and transportation in many school districts. In addition, some participants reported a lack of connecting families with services in the early years.

## High School Graduation Rate by Year, 2012-13 through 2018-19

The table below shows local, state, and national trends in cohort graduation rates.

*Note: Data for some states are omitted each year when they fail to meet federal reporting standards or deadlines. Use caution when comparing national trends as the “universe” population may differ over time.*

Attainment – Overview

Educational attainment shows the distribution of the highest level of education achieved in the report area, and helps schools and businesses to understand the needs of adults, whether it be workforce training or the ability to develop science, technology, engineering, and mathematics opportunities. Educational attainment is calculated for persons over age 25, and is an estimated average for the period from 2014 to 2019. For the selected area, 11.2% have at least a college bachelor’s degree, while 46.6% stopped their formal educational attainment after high school.

## HOUSING AND FAMILIES

This category contains indicators that describe the structure of housing and families, and condition and quality of housing units and residential neighborhoods. These indicators are important because housing issues like overcrowding and affordability have been linked to multiple health outcomes, including infectious disease, injuries, and mental disorders.

Furthermore, housing metrics like home-ownership rates and housing prices are key for economic analysis.

## HOUSEHOLDS - OVERVIEW

This indicator reports the total number and percentage of households by composition (married couple family, nonfamily, etc.). According to the American Community Survey subject definitions, a family household is any housing unit in which the householder is living with one or more individuals related to him or her by birth, marriage, or adoption.\* A non-family household is any household occupied by the householder alone, or by the householder and one or more unrelated individuals.

*\*Family households and married-couple families do not include same-sex married couples, even if the marriage was performed in a state issuing marriage certificates for same-sex couples. Same-sex couple households are included in the family households category if there is at least one additional person related to the householder by birth or adoption.*

## EVICCTIONS

This indicator reports information about formal evictions based on court records from 48 states and the District of Columbia, compiled by the Eviction Lab. The number of evictions and eviction filings within the report area is shown below. The “filing rate” is the ratio of the number of evictions filed in an area over the number of renter-occupied homes in that area. An “eviction rate” is the subset of those homes that received an eviction judgment in which renters were ordered to leave. For the year 2016, the Eviction Lab reports that, of 16,015 homes in the report area, there were 472 eviction filings, for an eviction filing rate of 2.95%. 250 of the eviction filings ended in an eviction, for an eviction rate of 1.56%.

*Note: Not all counties have data that has been provided. Indicator data do not include information about “informal evictions,” or those that happen outside of the courtroom.*

## HOUSING COSTS – COST BURDEN (30%)

This indicator reports the percentage of households where housing costs are 30% or more of total household income. This indicator provides information on the cost of monthly housing expenses for owners and renters. The information offers a measure of housing affordability and excessive shelter costs. The data also serve to aid in the development of housing programs to meet the needs of people at different economic levels. Of the 58,749 total households in the report area, 14,504 or 24.69% of the population live in cost-burdened households.

Report Area	Total Households	Cost-Burdened Households	Cost-Burdened Households, %

### Cost-Burdened Households by Tenure

These data show the number of households that spend more than 30% of the household income on housing costs. In the report area, there were 20,041 cost-burdened households according to the U.S. Census Bureau American Community Survey (ACS) 2015-2019 five-year estimates. The data for this indicator is only reported for households where household housing costs and income earned was identified in the American Community Survey.

Report Area	Cost-Burdened Households	Cost-Burdened Rental Households	Cost-Burdened Owner-Occupied Households (With Mortgage)	Cost-Burdened Owner-Occupied Households (With No Mortgage)
Schuylkill County	14,504	6,026	5,156	3,322
Pennsylvania	1,417,352	692,584	520,428	204,340
United States	37,249,895	20,002,945	13,400,012	3,846,938

27.39% of all households in Schuylkill County live in cost-burdened households, and over half of cost-burdened homes are rental household.

Participants in community meetings and interviews reported that it can be a challenge to find decent housing, which impacts health and the ability to get around. There are many old or dilapidated properties, which leads to health issues like allergies and asthma. Remediation expenses for lead, radon, mold, and asbestos to make older homes safe can be very expensive.

## Cost-Burdened Households Within Tenure Type

These data show the percentage of households by tenure that are cost burdened. Cost-burdened rental households (those that spent more than 30% of the household income on rental costs) represented 42.13% of all of the rental households in the report area, according to the U.S. Census Bureau American Community Survey (ACS) 2015-2019 five-year estimates. The data for this indicator is only reported for households where tenure, household housing costs, and income earned were identified in the American Community Survey.

Report Area	Rental Households	% of Rental Households That Are Cost Burdened	Owner-Occupied Households (With Mortgage)	% of Owner-Occupied Households With Mortgages That Are Cost Burdened	Owner-Occupied Households (No Mortgage)	% of Owner-Occupied Households Without Mortgages That Are Cost Burdened

## HOUSING QUALITY – SUBSTANDARD HOUSING

This indicator reports the number and percentage of owner- and renter-occupied housing units having at least one of the following conditions: 1) lacking complete plumbing facilities, 2) lacking complete kitchen facilities, 3) with one or more occupants per room, 4) selected monthly owner costs as a percentage of household income greater than 30%, and 5) gross rent as a percentage of household income greater than 30%. Selected conditions provide information in assessing the quality of the housing inventory and its occupants. This data is used to easily identify homes where the quality of living and housing can be considered substandard. Of the 58,749 total occupied housing units in the report area, 14,284 or 24.31% have one or more substandard conditions.

Report Area	Total Occupied Housing Units	Occupied Housing Units With One or More Substandard Conditions	Occupied Housing Units With One or More Substandard Conditions, %

## OTHER SOCIAL AND ECONOMIC FACTORS

### INSURANCE - UNINSURED POPULATION (ACS)

The lack of health insurance is considered a *key driver* of health status.

In the report area, 5.21% of the total civilian non-institutionalized population are without health insurance coverage. The rate of uninsured persons in the report area is greater than the state average of 5.68%. This indicator is relevant because lack of insurance is a primary barrier to health care access, including regular primary care, specialty care, and other health services that contribute to poor health status.

## PHYSICAL ENVIRONMENT

A community's health also is affected by the physical environment. A safe, clean environment that provides access to healthy food and recreational opportunities is important to maintaining and improving community health.

## FOOD ENVIRONMENT - SNAP-AUTHORIZED FOOD STORES

This indicator reports the number of SNAP-authorized food stores as a rate per 10,000 population. SNAP-authorized stores include grocery stores as well as supercenters, specialty food stores, and convenience stores that are authorized to accept SNAP (Supplemental Nutrition Assistance Program) benefits. The report area contains 132 total SNAP-authorized retailers with a rate of 8.90.

Report Area	Total Population (2010)	Total SNAP-Authorized Retailers	SNAP-Authorized Retailers, Rate per 10,000 Population
Schuylkill County	148,289	132	<b>8.90</b>

The most frequent barrier to health mentioned by community members and leaders was the lack of consistent access to health care services throughout the county. Participants called for a greater presence of health care services in the community, including through satellite sites, mobile units, pop-up clinics, and in-school services. In addition, preventive screenings and preventive services should be offered more widely, particularly in low-income communities.

Participants also suggested a number of other ways the health care systems could play a role in supporting health in the community. Limited broadband access prevents widespread use of technology such as telehealth and online registration. During the COVID-19 pandemic, these technological tools became more critical, but the older population in Schuylkill County struggles to utilize them. Health care systems can continue to find ways to increase access through technology as well as utilize retired or trusted health care professionals to provide health education and information in the community.

## CLINICAL CARE AND PREVENTION

A lack of access to care presents barriers to good health. Supply of facilities and physicians, the rate of uninsurance, financial hardship, transportation barriers, cultural competency, and coverage limitations affect access.

Rates of morbidity, mortality, and emergency hospitalizations can be reduced if community residents access services such as health screenings, routine tests, and vaccinations. Prevention indicators can call attention to a lack of access or knowledge regarding one or more health issues and can inform program interventions.

### CANCER SCREENING – MAMMOGRAM (MEDICARE)

This indicator reports the percentage of female Medicare beneficiaries age 35 and older who had a mammogram in most recent reporting year. The American Cancer Society recommends that women age 45 to 54 should get a mammogram every year, and women age 55 and older should get a mammogram every other year. In the latest reporting period, there were 22,923 Medicare beneficiaries in the report area, and 27% of female beneficiaries age 35 or older had a mammogram in the past year. The rate in the report area was lower than the state rate of 34% during the same time period.

Report Area	Medicare Beneficiaries	Female Beneficiaries With Recent Mammogram, %
Schuylkill County	22,923	27%
Pennsylvania	1,354,331	34%

## DIABETES MANAGEMENT – HEMOGLOBIN A1c TEST

This indicator reports the percentage of Medicare patients with diabetes who have had a hemoglobin A1c (hA1c) test, a blood test that measures blood sugar levels, administered by a health care professional in the past year. In the report area, 3,140 Medicare enrollees with diabetes have had an annual exam out of 1,924 Medicare enrollees in the report area with diabetes, or 87.4%. This indicator is relevant because engaging in preventive behaviors allows for early detection and treatment of health problems. This indicator also can highlight a lack of access to preventive care, a lack of health knowledge, insufficient provider outreach, and/or social barriers preventing utilization of services.

Report Area	Total Medicare Enrollees	Medicare Enrollees With Diabetes	Medicare Enrollees With Diabetes With Annual Exam	Medicare Enrollees With Diabetes With Annual Exam, %
Schuylkill County	17,636	1,924	1,681	<b>87.4%</b>

Participants in community meetings and interviews shared that they have noticed an increase in people who are managing diabetes. Diabetes impacts quality of life of residents and is a financial strain due to the cost of diabetes treatments. Community members suggested that there be a greater focus on health education around diabetes and other prevention efforts.

### Annual Hemoglobin A1c Test by Year, 2009 through 2015

Percent of Medicare beneficiaries with diabetes with annual hemoglobin A1c test

Report Area	2009	2010	2011	2012	2013	2014	2015
Schuylkill County	86.03%	85.68%	86.68%	86.70%	86.58%	88.08%	87.37%

United States	83.52%	83.81%	84.18%	84.57%	84.92%	85.16%	85.69%

Participants in community meetings and interviews expressed concern over the widespread use of drugs and alcohol in the county. Many people know someone struggling with drug and alcohol abuse, and community members acknowledged that drinking is a part of the generational culture in the county. They also identified that many community members lack coping and stress management skills, which adds to mental health and substance abuse concerns. Participants suggested creating a greater awareness of resources in the county to address mental health and substance abuse as well as additional prevention services, including in the schools.

23.2% of adults in Schuylkill County self-report no active leisure time.

## HEALTH BEHAVIORS

Health behaviors such as poor diet, a lack of exercise, and substance abuse contribute to poor health status.

### ALCOHOL – HEAVY ALCOHOL CONSUMPTION

In the report area, 29,929 or 21.07% of adults self-report excessive drinking in the last 30 days, which is greater than the state rate of 20.20%. Data for this indicator are based on survey responses to the 2018 Behavioral Risk Factor Surveillance System (BRFSS) annual survey and are used for the 2021 County Health Rankings.

Excessive drinking is defined as the percentage of the population who report at least one binge drinking episode involving five or more drinks for men and four or more for women over the past 30 days, or heavy drinking involving more than two drinks per day for men and more than one per day for women, over the same time period. Alcohol use is a behavioral health issue that is also a risk factor for a number of negative health outcomes, including: physical injuries related to motor vehicle accidents, stroke, chronic diseases such as heart disease and cancer, and mental health conditions such as depression and suicide.

Report Area	Adult Population	Adults Reporting Excessive Drinking	Percentage of Adults Reporting Excessive Drinking
Schuylkill County	142,067	29,929	<b>21.07%</b>
Pennsylvania	12,807,060	2,587,295	20.20%

### Adults With No Leisure-Time Physical Activity by Gender, 2017

The table below displays national, state, and local variation in the percentage of adults reporting no leisure-time physical by gender.

Report Area	Male		Female	
	Count	Percentage	Count	Percentage
Schuylkill County	12,831	21.9%	14,232	24.6%

United States	24,806,207	20.6%	30,455,202	23.5%

Many community members and leaders expressed a concern about the level of physical inactivity and obesity among residents in the county. Participants reported that there are limited opportunities for physical activity, and people tend not to walk places (i.e., sedentary lifestyle). Often programs are offered but then get canceled because of low participation. Participants also recognized that community members are working hard and prioritize care of house and family instead of self. There is a need for more accessible resources including groups, classes, and preventive services in communities.

## HEALTH OUTCOMES

Measuring morbidity and mortality rates allows assessing linkages between social determinants of health and outcomes. By comparing, for example, the prevalence of certain chronic diseases to indicators in other categories (e.g., poor diet and exercise) with outcomes (e.g., high rates of obesity and diabetes), various causal relationships may emerge, allowing a better understanding of how certain community health needs may be addressed.

### POOR OR FAIR HEALTH

This indicator reports the percentage of adults age 18 and older who self-report having poor or fair health (age-adjusted to the 2000 standard). Data are from the 2018 Behavioral Risk Factor Surveillance System (BRFSS) annual survey and are used for the 2021 County Health Rankings. This indicator is relevant because it is a measure of general poor health status.

**Within the report area, there are 6,709 persons age 18 and older who self-report having poor or fair health. This represents 19.5% of the total population age 18 and older, which is greater than the state rate of 17.7%.**

Report Area	Population Age 18+	Adults With Poor or Fair Health	Percentage of Adults With Poor or Fair Health

## MORTALITY – PREMATURE DEATH

This indicator reports the years of potential life lost (YPLL) before age 75 per 100,000 population for all causes of death. Figures are reported as crude rates, and as rates age-adjusted to year 2000 standard. YPLL measures premature death and is calculated by subtracting the age of death from the 75-year benchmark. Data are from the National Center for Health Statistics – Mortality files (2017-2019) and are used for the 2021 County Health Rankings. This indicator is relevant because a measure of premature death can provide a unique and comprehensive look at overall health status.

Within the report area, there are a total of 2,461 premature deaths. This represents an age-adjusted death rate of 9,758 per every 100,000 total population.

Report Area	Premature Deaths, 2017-2019	Years of Potential Life Lost, 2017-2019 Average	Years of Potential Life Lost, Rate per 100,000 Population
