Partnership Between Medical Technology Leader Medtronic and LVHN Will Reduce Care Costs by Millions – PHOTOS

BY ADMIN · FEBRUARY 28, 2018

Today at LVHN–One City Center, Medtronic, the global leader in medical technology, and LVHN announced a five-year strategic partnership aimed at developing innovative, sustainable and integrated value-based solutions to improve health care outcomes for our patients. The partnership will create programs that span more than 70 major medical conditions, with the goal of positively impacting as many as 500,000 patients in our community and reducing their cost of care by \$100 million.

The strategic partnership brings together the technological insights and operational efficiency expertise of Medtronic with the clinical expertise of LVHN. It also creates the opportunity for piloting and testing programs, processes and technology at LVHN across multiple disease states with a goal of creating new technologies and services that will drive better outcomes for patients at a reduced cost.

“This agreement is exciting not only for Medtronic and LVHN, but also for the health care industry, by serving as a template for how we can work together to achieve our mutual goals of better clinical and economic outcomes,” said Omar Ishrak, Medtronic Chairman and CEO. “By working in partnership, trusting each other and combining our expertise, we will create new models of care that are more

connected and coordinated. Ultimately, these value-based programs will contribute to a more sustainable health system and a healthier community.”

“As LVHN continues navigating the daunting challenges in today’s health care environment, we are actively searching for new approaches and partners for providing better health and better care at a better cost to our community,” says Brian Nester, DO, MBA, FACOEP, LVHN President and CEO. “The opportunity to create innovative programs through this first-of-its-kind partnership with Medtronic will enable both organizations to improve patient experiences and outcomes at a reduced cost.”

Initial programs will address conditions such as cardiovascular disease, stroke and lung cancer, with additional areas to be identified as the partnership progresses. These are key priorities for the community, due to rising numbers of LVHN patients impacted by and costs associated with these conditions.

Medtronic and LVHN will initially develop programs across 10 to 15 conditions and launch initiatives in three main areas: therapy optimization, episodic care bundles and chronic care management. The programs are designed to deliver improved efficiency, outcomes and patient experience.

Examples of these programs include:

- **Bariatric surgery:** In general, bariatric programs have a long and complex vetting process. The average length of time from an initial information session to surgery is several months, resulting in an average attrition rate of 70 percent. Medtronic is working with LVHN to create a clear process for patients to learn about bariatric surgery, align staff resources to meet the needs of this growing area, improve provider and patient awareness of the clinical and economic benefits of bariatric surgery, and increase access for patients by making more surgeries available to candidates within LVHN through improving clinical efficiency.
- **Respiratory compromise:** Patients with hospital-acquired respiratory compromise, often caused by pulmonary edema or pneumonia, on average cost U.S. hospitals approximately \$18,000. Through a clinical protocol, education and training with Microstream™ capnography technology – a noninvasive, continuous measurement of CO² concentration over time – Medtronic is helping LVHN detect signs of respiratory compromise earlier so clinicians can intervene sooner. The goal is to reduce respiratory compromise-related adverse events by at least 20 percent.
- **Thoracic oncology:** In its early stages, lung cancer presents few, if any, symptoms. Occasionally, lung nodules are identified as a secondary finding while the patient is being treated or tested for other conditions. Even when lung nodules are identified early, a lack of infrastructure, coordination and capacity to manage identified patients in a timely manner can lead to delays in diagnosis and treatment. Medtronic and LVHN are analyzing data on patients that pass through the health network to build a best-in-class model for the diagnosis and treatment of patients with lung disease. Medtronic’s capabilities in imaging, data informatics and image-guided intervention will help LVHN to reduce complications, control costs and maximize optimal treatment in the most efficient and effective manner possible, making a meaningful, positive impact on patient care.

Measuring value

A key element enabling the success of the strategic partnership between Medtronic and LVHN will be the development of an innovative data collection and analysis initiative that will allow the two organizations to demonstrate improved outcomes and economic value.

The collaboration will aim to develop, test and validate their data science capabilities. This will require the utilization and application of techniques that will reliably extract data from multiple sources, including LVHN's electronic medical records, for quality evidence generation. This data will be used to measure outcomes and drive implementation and measurability of new solutions aimed at improving health care value.

Visit the Colleague Resource Center

BY [RICK MARTUSCELLI](#) · FEBRUARY 26, 2018

The Colleague Resource Center (CRC) is now live. It's where you can find all the human resources (HR)-related information you need in one location. This new resource is one more way we're creating a great work experience for you. Here's a Q&A that will help you understand and effectively use the Colleague Resource Center.

What is the Colleague Resource Center?

The Colleague Resource Center replaces the HR intranet site and Lawson dashboard. The information previously found on those sites is now easily accessible on the Colleague Resource Center. It contains information specific to you. Visit it to see your pay, benefits, sick time and PTO balances, and more. You'll also go there to enroll in benefits and change your personal information if you get married, have a baby or experience another life event.

How do I access it?

Go to your SSO toolbar, click the "LVHN CRC" graphic and enter your system user identification (SUI) and password.

How do I navigate the Colleague Resource Center?

Navigating the website is easy. First, print the [Colleague Resource Center User Guide](#) and post it nearby for easy reference. It explains where to click to perform certain tasks, where you can find items most commonly searched for, and how to submit a question to HR.

You also should click around the site to get accustomed to it. As you're doing so, consider entering your personal cellphone number and email address. To do so, click the "Employee Resources" tile. Then, under "Employee Self-Service," click "Personal Contact Numbers." In the near future, you'll be able to opt in to receive personal texts and emails containing important information about LVHN. It's one more way you can stay connected with our health network.

How do I find the information I'm looking for?

The “Search” function of the Colleague Resource Center works great. Simply type in what you’re looking for and it will appear. With this functionality, colleagues should be able to find answers to 85 percent of their questions using this online tool.

What should I do if I have a question?

Click the “Ask HR and View My Cases” tile. Then enter your topic, subject and issue, and click submit. Your question will be routed to an HR representative. The response will appear on your “Ask HR and View My Cases” page. The answers to all the questions you submit will remain on your page for easy reference.

If you have a question, you also can call the Colleague Resource Center phone number 844-GO-ASK-HR (844-462-7547). You’ll speak with an HR representative. To discuss your personal information, you’ll need to supply your employee ID number, which is different than your SUI.

Where do I find my employee ID number?

Your employee ID number can be found within the Colleague Resource Center in three places:

- In the top left box on the home page
- On your pay stub
- In your “Job Profile”

Does the Colleague Resource Center have a section for managers?

Yes. All of the information previously accessible in the “Manager Self Service” section of Lawson is now accessible in a section of the Colleague Resource Center titled “Management Resources.”

Relief for Colleagues in Need

BY [SHEILA CABALLERO](#) · FEBRUARY 27, 2018

Sometimes life takes an unexpected turn and you need a little help to get back on your feet. That's why we've created a Colleague Relief Fund to help colleagues who have experienced an unexpected hardship or tragedy.

If you have experienced loss due to a house or apartment fire, flooding, trauma or other tragedy outside your control, you may be eligible for the need-based financial award.

To be considered, you must submit a Colleague Relief Fund application that includes a personal statement along with supporting financial documents within 45 days of the event. A committee of colleagues will review your application in confidence and make a decision based on your eligibility and demonstrated need. Need-based awards are available up to \$1,200 over a 12-month period (\$5,000 lifetime maximum).

You can read the full policy including eligibility requirements by visiting [Policy Tech](#) and searching for Colleague Relief Fund.

At LVHN, our colleagues are our most important asset. That's why we offer generous resources to enhance and protect your physical and emotional well-being. Because when you're at your personal and professional best, you're better able to deliver excellent care to our entire community.

If you have questions, please contact the Colleague Resource Center at 844-GO-ASK-HR (844-462-7547).

Service Anniversary List – March 2018

Sign Up for Sodexo's Frequent Diner Awards Program

BY [EMILY SHIFFER](#) · FEBRUARY 27, 2018

Start earning rewards for eating at LVHN cafeterias.

Sodexo Frequent Diner Rewards is a free program that gives you points toward rewards for all purchases at LVHN cafés, and even more reward points when you select a healthy food item.

For every 500 points accumulated, you will receive a \$5 Sodexo gift card. **You will earn double points on healthy choice items like:**

- Mindful grab-and-go items
- Salad bar
- Healthy snacks
- Calorie-free beverages
- Limited time offers

You also get an additional 20 points on your birthday and sign-up anniversary.

To register, visit any of the Sodexo cafés at LVHN. When you register, you'll receive a frequent diner card that will activate on your first purchase.

Did We Reach Our Goals in February?

BY RICK MARTUSCELLI · MARCH 2, 2018

We need your help. The health network goals we were not meeting in January remain in the red (see chart). We also have work to do to achieve our outpatient experience goal, which we began measuring in January. But if we work together, we can give the people of our community the better health, better care and better cost they expect and deserve, and possibly earn a bonus in the process.

Two of the goals currently in the red are linked to our Shared Success Plan (SSP) bonus. Remember, if we do not meet these goals or our health network's financial goals, an SSP bonus (as well as other bonuses) may not be rewarded in October to eligible colleagues.

Here are things you can do to enhance our performance, turn our "red" goals "green," and earn a well-deserved bonus later this year.

Overall

- [Submit your suggestions to the Bright Idea Generator](#) about how we can achieve our goals and make LVHN even better.

Improve breast cancer screening

- If you work in an LVPG practice, help women schedule their screening mammogram before they leave the office.
- Promote preventive screenings to patients, family and friends ages 40-75.
- Tell women with a MyLVHN account that they can schedule their own screening mammogram on the schedule page without a prescription.

Meet inpatient experience goals

- If you work on a patient care unit, make sure bedside shift report, hourly rounding and nurse director rounding are standard work.
- Talk with leaders during PRIDE Rounding and share your ideas about ways we can make the patient experience even better.
- If you're an inpatient unit director or medical director, visit the new HCAHPS data portal. It provides detailed feedback from patient surveys that you can use to develop plans to make our patients' hospital stay even better.

Meet outpatient access goals

- Just say yes and strive to get patients an appointment "today, tomorrow or the next day."
- Tell people how easy it is to access care at LVHN and encourage them to see us when they need care. Read the [Convenience Tool Kit](#) for details.

Optimize cost per patient encounter

- Eliminate non-value added work in all processes and non-value added meetings.
- Shorten meeting time wherever possible to conserve time to drive continuous improvement, reduce expenses and grow our health network.

Women Caring for Women at Lehigh Valley Heart Institute

BY [EMILY SHIFFER](#) · MARCH 1, 2018

The Region's Largest Heart and Vascular Program for Women

Amy Ahnert, MD
Heart and Pregnancy

Nidhi Mehta, MD

Mila Ju, MD
Vascular Surgery

We get it.
We know that, as a woman, you often put the needs of others before your own. That's why in 2005, we started the Heart and Vascular Program for Women. For 13 years, we've helped women live a heart-healthy lifestyle. So it's no coincidence that eight of our heart and vascular specialists are women—more than any other health network in the region. Speak to one of our specialists about your heart health today.

CALL OR CLICK FOR AN APPOINTMENT
888-402-LVHN · LVHN.org/WomensHeart

 **Lehigh Valley Heart Institute**
LEHIGH VALLEY HEALTH NETWORK

LVHN is devoted to helping women live heart-healthy lifestyles. For the past 13 years, colleagues in the Heart and Vascular Program for Women have cared for women across the region. They help women be at their best so they can support the ones they love.

Now Lehigh Valley Heart Institute is continuing its focus on “women caring for women.” To tell our community about our commitment to women’s heart care, eight of our heart and vascular specialists are featured in the latest Lehigh Valley Heart Institute marketing campaign. They are (l-r):

- Amy Ahnert, MD, Heart and Pregnancy
- Nidhi Mehta, MD, Heart and Pregnancy
- Yasotha Rajeswaran, MD, Cardiac Imaging
- Ellina Feiner, MD, Peripheral Vascular Disease
- Deborah Sundlof, DO, Cardio-Oncology

- Kelly M. Wanamaker, MD, Cardiothoracic Surgery
- Cheri Silverstein Fadlon, MD, Cardio-Oncology
- Mila Ju, MD, Vascular Surgery

The LVHN Heart Institute has more women heart and vascular specialists than any other health network in the region. And aside from providing excellent heart care, these women are outstanding mothers, athletes and educators.

You can see the full ad shown here in the February issue of Lehigh Valley Style on pages 13 and 14.

Get 20 Percent Off LVHN Sport-Tek Fill Zip Jacket

Colleagues ‘Give Kids a Smile’ – VIDEO

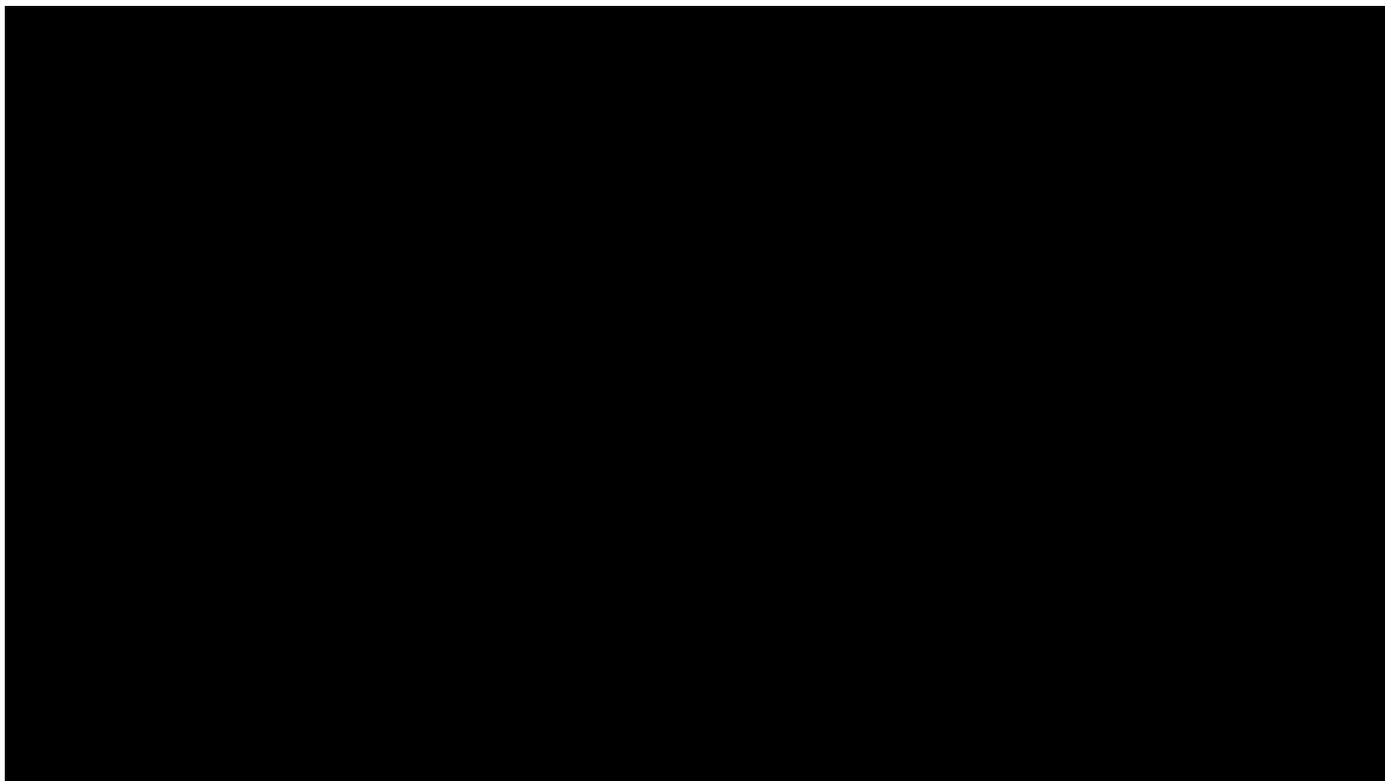

BY [EMILY SHIFFER](#) · MARCH 1, 2018

LVHN continues to spread smiles and cheer to the people of our community. That includes local kids.

LVHN’s department of dental medicine recently held its 14th annual “Give Kids a Smile Day.”

Pediatric dentists, dental residents, hygienists and oral surgeons cared for local children by providing free exams, cleanings, X-rays and more. Watch a recap from this year’s event.

The video below will only play in Google Chrome. If you are using Internet Explorer, click [here](#) to watch.

Woman Celebrates Successful Robotic Surgery on WFMZ – VIDEO

BY [JENN FISHER](#) · FEBRUARY 28, 2018

Aniko Molnar celebrated her 35th birthday on WFMZ television last week, but that wasn't her top reason for appearing on the morning newscast. Molnar was there to share her personal story of a cervical cancer diagnosis, the importance of cancer screening and fertility-sparing surgery she had at LVHN.

Five years ago, Molnar noticed irregular bleeding between menstrual periods. She took her concerns to her gynecologist and was eventually diagnosed with early stage cervical cancer. Surgeon Martin Martino, MD, a gynecologic oncologist with Lehigh Valley Cancer Institute and his surgical team performed a minimally invasive robotic surgery to remove Molnar's cancerous cervix and surrounding tissue until no cancer was detected in the margins. This was all done with the intent to leave her uterus intact for a future family.

Fast forward to today, Molnar is healthy and thankful she still has the ability to carry a pregnancy all because of the minimally invasive surgery. "I am looking forward to having my own family one day," she says. "Thank God for Lehigh Valley and Dr. Martino."

"We work with a team of highly qualified nurses and residents, and together we have been able to deliver exceptional outcomes," Martino says.

Martino demonstrated the enhanced dexterity and 3-D view provided by the da Vinci® Xi™ Surgical System, which can be used for gynecologic, urologic, cardiac, thoracic and other general surgeries. LVHN's robotic surgery team covers ten service lines and includes more than 50 surgeons.

LVHN 5K Run/Walk Set for April 28

BY [JANE DANISH](#) · FEBRUARY 26, 2018

It's not spring yet, but the Run/Walk Committee is already gearing up for the 2018 LVHN 5K Run/Walk. This very popular event, sponsored by the Health & Wellness Center at Hazleton, is scheduled for Saturday, April 28, at Hazle Township Community Park.

The event features a free Kids' Run for children ages 11 and younger beginning at 9:30 a.m., the 5K run/walk at 10 a.m. and a complimentary picnic lunch following the race. Early registration fee is \$20 and extends until April 14. Race day or late registration fee is \$25. A T-shirt is guaranteed with early registration.

Monetary prizes and awards will be presented to the top three overall male and female runners and walkers. Medals will be awarded to the top three male and female runners and walkers in the specific age groups. (PIAA rules apply to student athletes.)

Spring will be here before you know it. So lace up your sneakers and register today at LVHN.org/runwalk. An application form may also be found on the LVH–Hazleton intranet site under [Recreational Activities/Colleague Special Events](#).

The LVHN 5K Run/Walk is part of the 2018 Greater Hazleton Festival of Races.
