## PC Quality & Network Alignment/Reporting

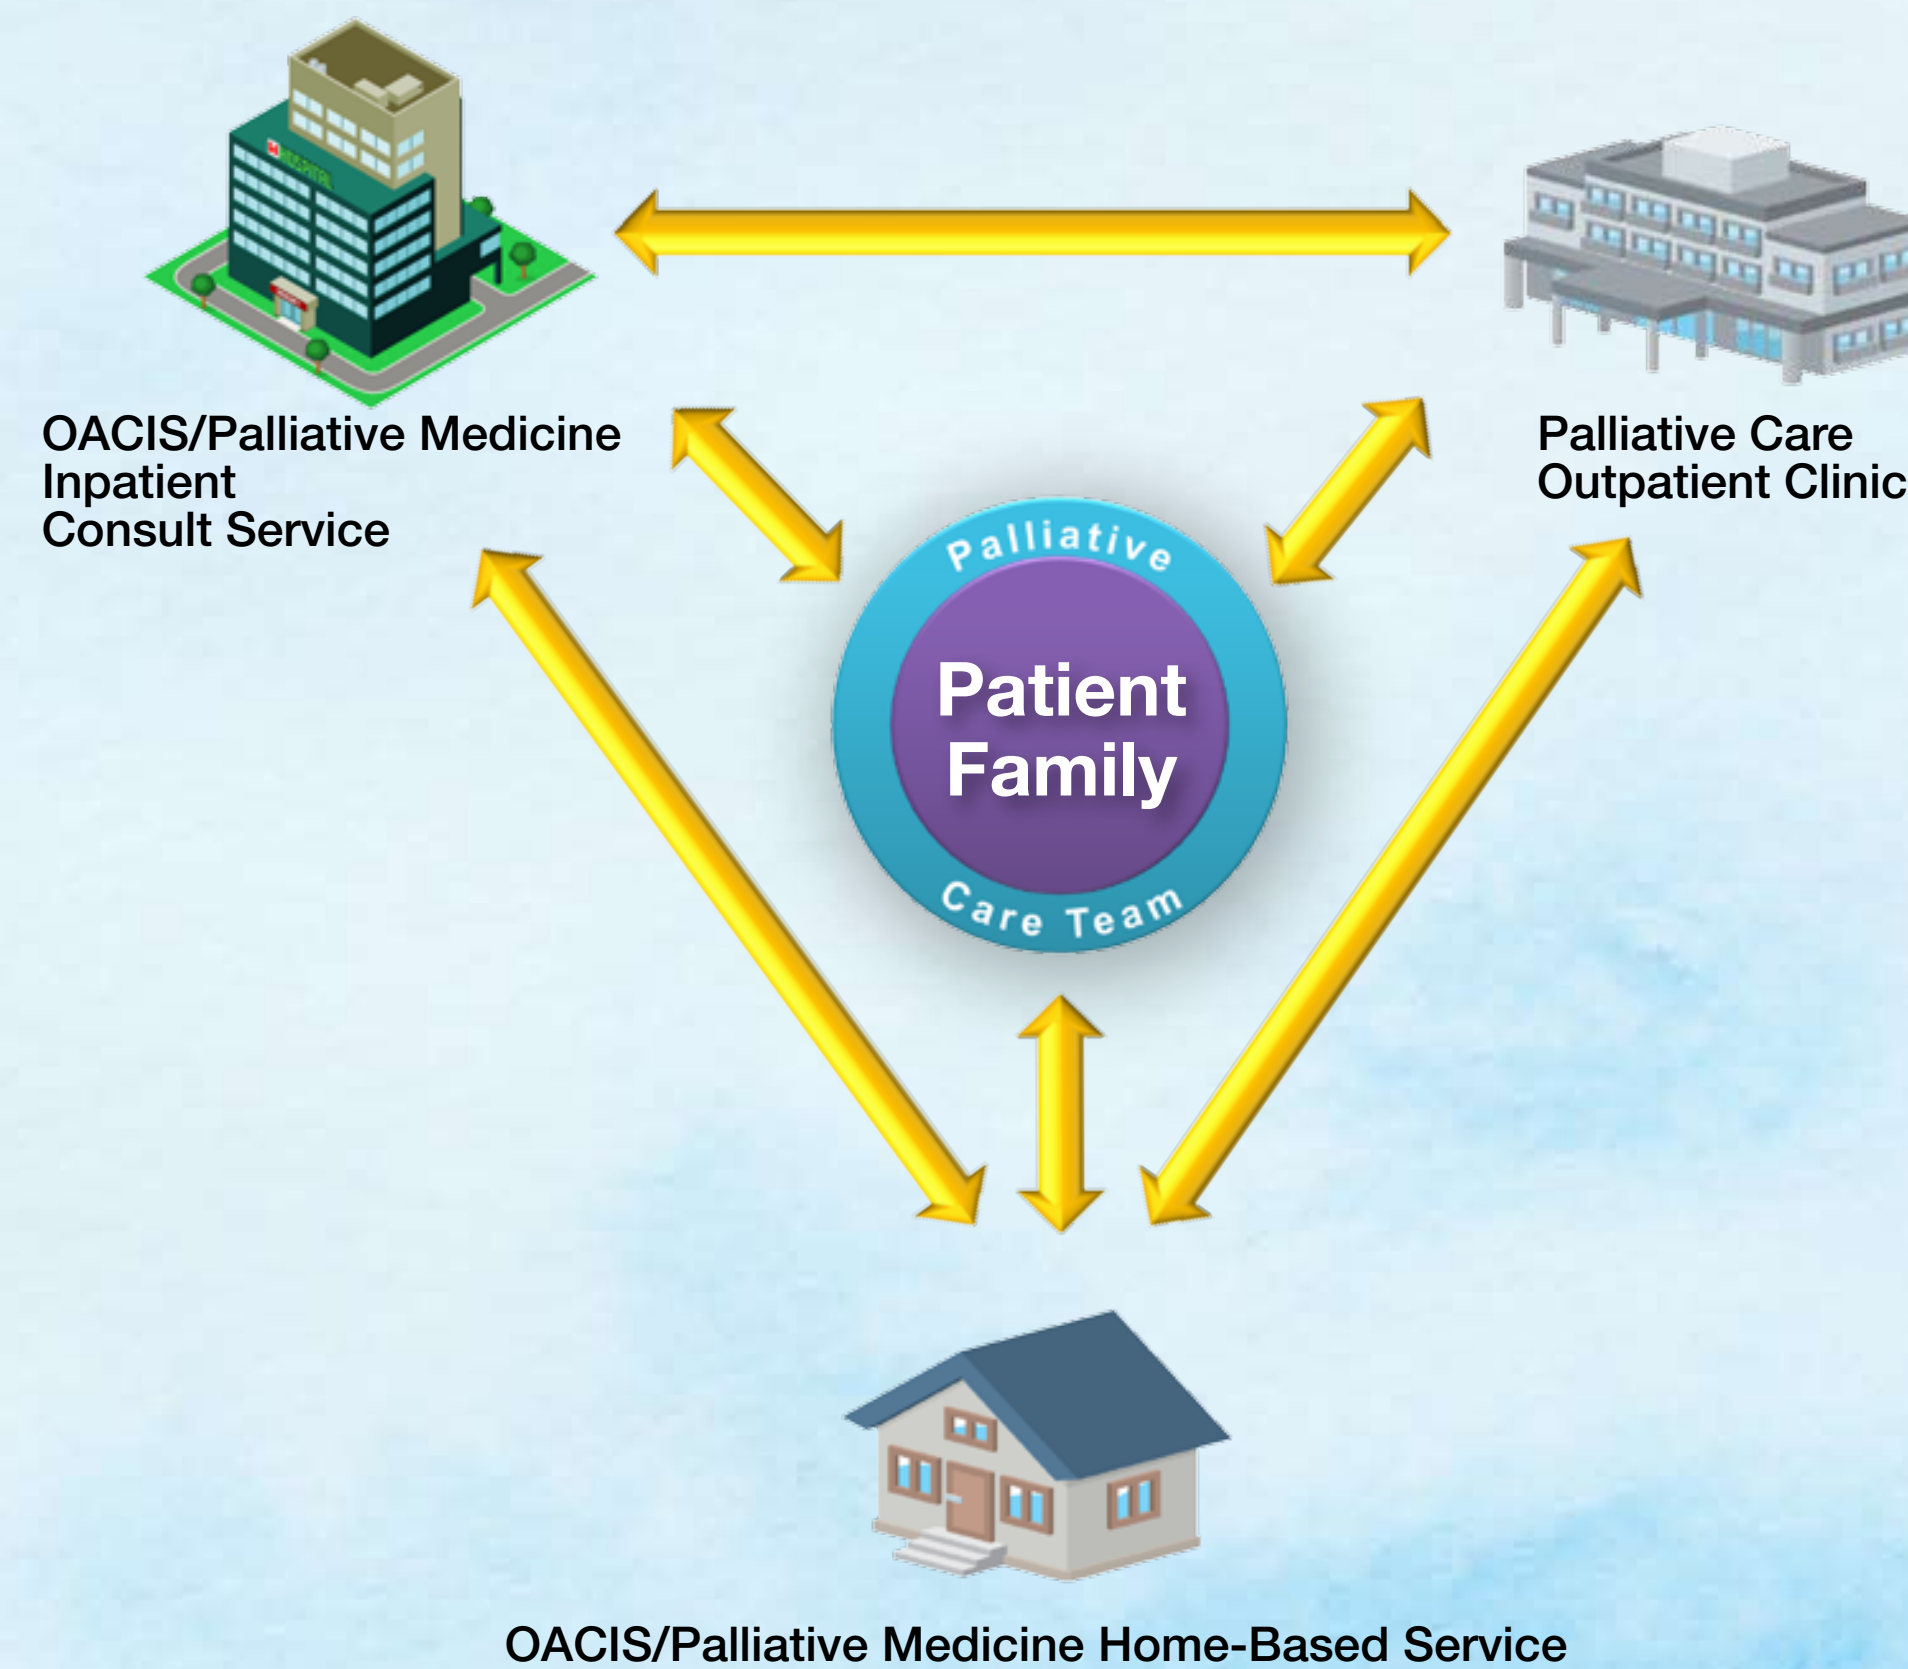

## Key Activities

- Identification/monitoring of quality metrics
- Evaluation of patient health across the continuum
- Determination of access to care
- Assessment of program processes and financial results
- Envision network alignment & QI opportunities

## Conclusion

The Quality Council plays an important role in the identification, tracking and monitoring of key program metrics, the linkage of the Palliative Medicine Program with quality efforts in other departments and alignment with network priorities. In addition, it contributes to the exploration of a PC continuum in the context of healthcare reform.
