

Sticking to Our New Year's Resolutions

Each January, Americans flock to gyms across the country with newfound resolve. They toss their cigarettes in the trash can. They swear off carbs and meat and alcohol and coffee. For many of us, the promise of beginning anew is too powerful to resist. Until it's not.

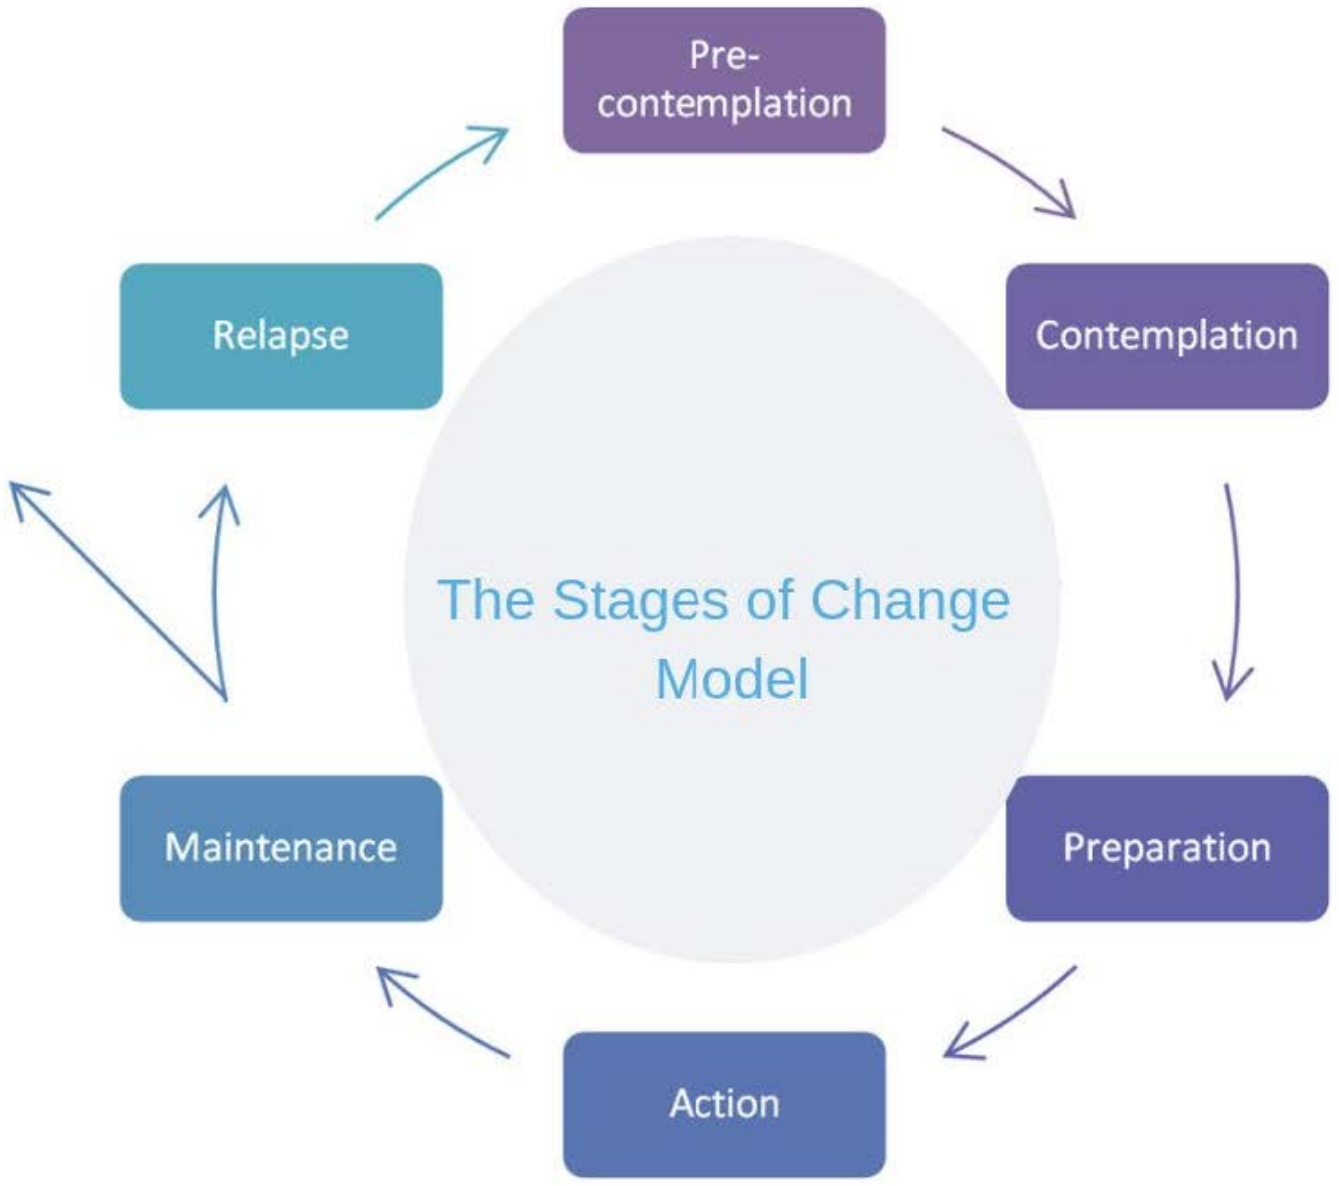

It's a familiar story. According to a survey from the online polling company YouGov, although 68 percent of Americans have sought to change their behavior through New Year's resolutions, only 8 percent have succeeded.¹ As physicians, we understand that the top risk factors for premature mortality are diet, high blood pressure, obesity and tobacco use, and we strive to address unhealthy behaviors with our patients.

The beginning of the calendar year is a time when people are focused on their desire to change, but effective methods to help modify behavior can be elusive. Most patients understand that smoking is harmful, for example, but it is difficult to quit.

In the late 1970s, psychologists James Prochaska and Carlo DiClemente developed the Stages of Change model. It describes the phases people go through on their way to change: precontemplation, contemplation, preparation, action and maintenance, with relapse a normal part of the process.²

Patricia Martin, MD
President, Medical Staff
Radiology-Diagnostic Medical Imaging
Diagnostic Radiology

In theory, if we as health care providers take time to understand which stage the patient is in, we can ask pointed questions to nudge them to the next stage. However, no matter how skilled providers become at motivational interviewing, we would need a lot of time to make this work. Not only is it impractical in work environments driven by relative value units (RVUs), it is also ineffective. The model's most critical flaw is that it assumes people make rational decisions about their health. Anyone who has ever had one too many beers or reached for a tub of Häagen-Dazs after a frustrating day at work knows this is not true.

There has to be a better way to steer people to do the right thing. Humans may not behave rationally, but their behavior is often predictable. Israeli psychologists Daniel Kahneman and Amos Tversky laid the foundation for the field of behavioral economics by designing experiments that showed we often make decisions that are not in our best economic interests.

The key is to understand how we are wired in order to design the right incentives and deterrents to help us make better choices.³ Medical researchers and business leaders have begun to apply some of the principles to promote healthier behaviors and have had modest success. In a recent trial of smoking cessation involving more than 6,000 participants, cash incentives were superior to other more traditional interventions in achieving abstinence.⁴

Another area of active research involves the use of technology, games and social networks. Mobile applications like the Reflexion Health app assist patients with virtual physical therapy, using animated figures that show correct form and provide instant feedback. Victims of stroke and spinal cord injuries are using virtual reality games such as those by neurotechnology startup MindMaze for physical and mental rehabilitation. Some fitness apps use cash incentives and peer pressure to achieve compliance with fitness regimens; members who don't meet their goals must pay those who do. There is preliminary evidence that these "gamification strategies" can work.⁵

Learning from this new research and helping our patients (and ourselves!) stick to resolutions is at the heart of what we strive to do. Long-term behavior change could save millions of health care dollars annually and save lives. It is worth the effort and creates opportunities for all of us in this New Year and those that follow.

GLVIPA General Membership Meeting Scheduled January 28

The next general membership meeting of the Greater Lehigh Valley Independent Practice Association will be held on Monday, Jan. 28, 2019, beginning at 6 p.m. in the Lehigh Valley Hospital (LVH)–Cedar Crest Auditorium with video conferencing to LVH–Muhlenberg, LVH–Hazleton, LVH–Pocono and LVH–Schuylkill.

For more information, contact [Mary Ann Curcio](#), Coordinator, Greater Lehigh Valley Independent Practice Association, at **610-969-0423**.

Allied Health Staff Biennial Reappointment Deadline Sunday, Jan. 20

In compliance with the regulations of the Pennsylvania Department of Health, the Medical Staff and Hospital Bylaws, the standards of the Healthcare Facilities Accreditation Program (HFAP) and The Joint Commission (TJC), each member of the hospital's Allied Health Professional staff must be reappointed a minimum of once every two years.

On Jan. 1, 2019, the biennial reappointment process was put into motion when reappointment applications were made available for more than 950 members of the Allied Health Professional staff.

Directions for completing the reappointment application process are included with the application notice sent to the provider. This new reapplication process has data screens requiring the practitioner to review the current data and add or change as appropriate. The practitioner should review the directions provided to make sure all the information is completely addressed and arrangements for submission of all the required documents have been made. This information will serve as both the official and confidential file for the Medical Staff Services office and the network.

The deadline to return reappointment applications is Sunday, Jan. 20, 2019.

If you have any questions related to the reapplication requirements or submission of supporting documents, please call Medical Staff Services at **484-862-3900**.

If you have any problems related to logging in to the application or technical questions concerning completing the application, please call Rita Mest and Diane Horoski at **484-862-3141** for assistance.

Advance Care Planning eBook: Your Life, Your Wishes

Advance health care directives (AD) are important documents that allow people to express their wishes, preferences and instructions for their future health care. AD allow you to pick the person who will share your wishes for care if you cannot speak for yourself.

A Lehigh Valley Health Network (LVHN) colleague survey conducted during the 2017 flu clinic demonstrated that only 10 percent of the population had an advance care plan and shared it with their family and health care provider.

Advance Health Care Directives
Your Life, Your Wishes

Your choices for medical care are important — even if you cannot speak for yourself.

Click here to begin ▶

Lehigh Valley Health Network

The graphic features a diverse group of stylized human figures in a park-like setting. In the foreground, a woman in an orange jumpsuit sits on a blue bench. Behind her, a man in a blue shirt and a woman in a purple hijab and dress sit on the same bench. To the right, a man in a blue shirt sits in a wheelchair. In the background, a man in a white thobe and ghutra, a woman in a purple top, and an older man with a grey beard stand. The scene is set against a green hill, a large green tree, and a blue sky with two birds flying.

To promote the completion of an AD, DOE Patient Education and the Advance Care Planning Committee, with support from a Dorothy Rider Pool Health Care Trust grant, created an interactive ebook to educate our colleagues and community. This ebook incorporates videos, an advance directive form (which can be completed online) and a survey that will collect feedback on the ebook and the user's confidence in create a directive after using the interactive book.

This interactive ebook is available at education.lvh.com/advancecareplan/lvhn.html. It can also be accessed by

scanning the QR code provided. It is best viewed in Google Chrome. You are encouraged to read the book, complete an advance health care directive and share it with your family and provider. Urge your patients to complete an AD by providing an advance health care directive flyer or a handout called, “Your Information Prescription: Talking About End of Life Care,” located on the Patient Education page of the LVHN Intranet. The Information Prescription also contains links to other videos and documents that will help educate your patients on advance health care planning.

How to scan the QR code: Install a QR code reader app on your cellphone.

Open the app and aim your phone camera at the QR code to read the ebook.

For more information, contact Patient Education at **610-402-2487**. Or visit patienteducation.content.lvh.com.

Upcoming LVHN Special Events

Mark your calendar for these Lehigh Valley Health Network special events coming up in the New Year:

- May 20, 2019 – 27th Annual Golf and Tennis Classic, Saucon Valley Country Club
- 29, 2019 – 24th Annual Nite Lites Gala, Lehigh Valley Hospital–Muhlenberg

Andrew Sumner, MD, Named Chief of Cardiology

Andrew Sumner, MD, has been appointed as Chief of Cardiology. Sumner joined Lehigh Valley Health Network (LVHN) in 2006 from Penn State College of Medicine, where he served as Associate Professor of Medicine and Radiology. He came to LVHN as a cardiologist and director of noninvasive cardiology for the network.

For the past 10 years, he has served as practice leader of LVPG Cardiology—1250 Cedar Crest and helped oversee the practice as it has grown from 12 cardiologists and three advanced practice clinicians (APCs) to more than 35 cardiologists and 15 APCs. In 2018, he became Associate Medical Director of Lehigh Valley Heart Institute.

Sumner earned his medical degree from the Pennsylvania State University College of Medicine and completed his internal medicine residency at the Penn State Milton Hershey Medical Center, where he also served as Chief Medical Resident. He completed his cardiology fellowship at the University of Rochester, Strong Memorial Hospital and a mini-fellowship in cardiac MRI at the University of Virginia. He is boarded in cardiology, echocardiography and clinical lipidology.

Clinically, Sumner has been active in patient care, imaging, and established and directs health network's lipid clinic. He has been the primary investigator on several multicenter clinical trials as well as several investigator-generated trials. He has published in the area of lipid management, preventive cardiology and imaging.

Sumner and his wife Lucy live in Coopersburg with their son Jeremy and daughter Hanna.

LVH–Cedar Crest Receives Healthgrades Awards

Lehigh Valley Hospital (LVH)–Cedar Crest was the only hospital in our local and extended markets to receive all three of the prestigious cardiovascular related awards in the 2019 Specialty Excellence Awards from Healthgrades: America's 50 Best Hospitals for Cardiac Surgery, America's 100 Best Hospitals for Cardiac Care and America's 100 Best Hospitals for Coronary Intervention. In addition to this being a hospital award, LVH–Cedar Crest is the flagship of Lehigh Valley Heart Institute.

The America's 50 Best Hospitals for Cardiac Surgery Award™ recognizes hospitals for superior outcomes in heart bypass surgery and heart valve surgery. Patients who have these surgeries at these nationally recognized hospitals have a lower risk of dying.

The America's 100 Best Hospitals for Cardiac Care Award™ recognizes hospitals for superior outcomes in heart bypass surgery, coronary interventional procedures, heart attack treatment, heart failure treatment and heart valve surgery. Patients who have these treatments or procedures at these nationally recognized hospitals have a lower risk of dying.

The America's 100 Best Hospitals for Coronary Interventional Award™ recognizes hospitals for superior outcomes in coronary intervention procedures. Patients who have these procedures at these nationally recognized hospitals have a lower risk dying.

An America's 50 Best Hospitals for Specialty Care award is given when fewer than 100 hospitals have the superior outcomes necessary to be recognized as an America's Best Hospital for the corresponding specialty area. Furthermore, an America's 100 Best Hospitals for Specialty Care award is given to hospitals that perform at the top 10 percent in the nation in that specialty. This means that according to Healthgrades, LVH–Cedar Crest is among the top 50 hospitals nationally for cardiac surgery and in the top 10 percent for cardiac care and cardiac interventions in the United States.

Conflict of Interest/Commitment Questionnaire 2019

As stipulated in the Medical Staff Bylaws, all members of the Medical Staff are required to complete the Lehigh Valley Health Network (LVHN) Conflict of Interest/Commitment Questionnaire on an annual basis. This year, you are required to complete the Conflict of Interest Questionnaire by Tuesday, April 2, 2019.

Please remember, the overarching purpose of our conflict of interest policy is to protect LVHN's interest when it is entering into or contemplating a transaction or arrangement that might benefit the private interest of any individual who has a role in the decision-making process with respect to the transaction or arrangement, or who otherwise has the ability to affect the decision-making process in any manner.

The LVHN Compliance Services Department has partnered with Health Endeavors to administer the Conflict of Interest Questionnaire. The information is confidential and will be reviewed by LVHN Compliance Services.

In January, you received an email via your LVHN email account that included your personalized link to access the new online questionnaire.

If you have questions related to the questionnaire, contact [Shannan Ott](#) or [Gwen Pongracz](#) in Compliance Services via email Compliance_Services@LVHN.org.

Other pages within this guide will provide the resources you need to build a professional bibliography. You will find information on citing the literature, web pages and e-books. Writing and submitting an article and information presenting a poster at a conference are all to be found in this guide.

You also can contact one of the Medical Librarians who can assist with the process.

For more information, contact Library Services at libraryservices@LVHN.org or **610-402-8410**. Or you can submit a question through the “Ask a Librarian” link found on the Library Services Digital page. Visit the Digital Library Services page on the LVHN Intranet by clicking on FIND FAST and then choosing Library Services.

Make a Research Resolution

It's a new year and perhaps you have been diligently keeping track of collecting data on a group of patients who have participated in a particular treatment. Maybe you have had a reorganization in your practice and have kept data on whether this has been an improvement. You have kept spreadsheets on this information with the idea of publishing your findings. Now is the time to begin the process of writing and submitting your article.

Where to begin? Even if you have read some articles or attended presentations on the research, it is a good idea to begin with a literature search. What have others done on this subject? You begin by going to the Library Services Digital site and check out the search engines listed under the FIND ARTICLES heading.

FIND ARTICLES

Medline (Ebsco)   	HealthStar   
CINAHL (Nursing & Allied Health)   	Health & Psychosocial Instruments (HaPI)   
Cochrane Clinical Answers  	Psychology and Behavioral Sciences   
Cochrane Database of Systematic Reviews    	Ovid Medline   
Cochrane Central Register of Controlled Trials    	PubMed Medline    NOTE: Includes some poor quality journals
Cochrane Methodology Register    	PubMed Single Citation Matcher 
Google Scholar 	PubMed Clinical Queries 
Health Business Elite   	More..

If your subject has to do with a treatment or procedure for patient care, you will want to begin with Medline. If you are looking for information dealing with health business practices, you may want to check out Health Business Elite. If your practice treats behavioral health patients, you will want to search the Psychology and Behavioral Sciences engine. If you have questions, you can contact a Medical Librarian, who will assist with your search or questions.

Once you have completed your research, it's time to select a journal in which to publish. On the Library Services Digital site, click on the Writing and Citing guide.

Subject Guides and Reading Lists
Training & Tutorials

LVHN 201

To ensure that you select a well-respected journal, there are two pages in the guide to assist with that decision, “Selecting a Journal for Publication” and “Finding Peer Reviewed Journals.”

Other pages within this guide will provide the resources you need to build a professional bibliography. You will find information on citing the literature, web pages and e-books. Writing and submitting an article and information presenting a poster at a conference are all to be found in this guide.

You also can contact one of the Medical Librarians who can assist with the process.

For more information, contact Library Services at libraryservices@LVHN.org or **610-402-8410**. Or you can submit a question through the “Ask a Librarian” link found on the Library Services Digital page. Visit the Digital Library Services page on the LVHN Intranet by clicking on FIND FAST and then choosing Library Services.

January 2019 Papers, Publications and Presentations

- Jeanne Jacoby, MD, of the Department of Emergency Medicine, co-authored an article, “Left ventricular perforation with catheter decompression: case report and review of complications.” It was published Oct. 26, 2018, online ahead of print in the American Journal of Emergency Medicine.
- Brian Stello, MD, and Beth Careyva, MD, of the Department of Family Medicine, co-authored an article, “Decision support and navigation to increase colorectal cancer screening among Hispanic patients.” It was published Oct. 17, 2018, online ahead of print in Cancer Epidemiology, Biomarkers & Prevention.

January 2019 Upcoming Seminars, Conferences and Meetings

Department of Education Conferences

- 9 – Child Maltreatment
- 25-26 – Department of Anesthesiology Ninth Annual Winter Retreat Conference; Bear Creek Mountain Resort, Macungie

For details, call 610-402-2277, option 1, or visit go.activecalendar.com/LVHN-DOE.

Surgical Grand Rounds

- 8 – Medical Education: Hot Topics with Joseph Stirparo, MD, and Amy Smith, PhD; LVH–Cedar Crest auditorium, 7–8 a.m.

For more information, contact Wendy.Hess@LVHN.org.

Pediatric Grand Rounds

- 8 – Topic TBA, with Melissa Brannen, MD, pediatric hospitalist; LVH–Cedar Crest Kasych Family Pavilion, ECC Room 6, 8-9 a.m.
- 15 – Applying Motivational Interviewing to Pediatric Care, with Bridget Blitz, LCSW; LVH–Cedar Crest Kasych Family Pavilion, ECC Room 6, 8-9 a.m.
- 22 – Topic TBA, with Yallie Perez, MD, PGY-III; LVH–Cedar Crest Kasych Family Pavilion, ECC Room 6, 8-9 a.m.
- 29 – CSC Verification, PIPS Programs and Other QI Initiatives, with Robert Cilley, MD, Penn State Children's Hospital; LVH–Cedar Crest Kasych Family Pavilion, ECC Room 6, 8-9 a.m.

For more information, contact [Cari Cleffi](#) in the Department of Pediatrics at 484-862-3131.
