### It Takes Cash to Support It—Donations Are Asked for.

The Allentown Hospital has a remarkable career. This is true when we consider the number and capacity of other hospitals that have been established and when we consider the liberal provision made for their maintenance. It is also time that the actual value and need of the hospital is being realized far and wide among the people.

The question was recently asked: What did the people do with their sick and injured a few years ago? It is difficult to answer. Quite certain we may be that the sick and injured did not receive such careful systematic nursing as is being provided for them in our well-established hospital. At our hospital suffering is greatly diminished, life is prolonged, the poor have the services of the most skillful physicians and surgeons and the sympathetic attention of well-trained nurses. We are glad and proud to say that whatever medical science and surgical skill can do for suffering humanity is within the reach of the poor as well as the rich. This is because the good people of our city and its surrounding country have worked so hard for our hospital. We are glad to say that the institution is free of debt but it took all the money the board had on hand, some \$45,000. We know that everybody is proud of our hospital. When you go to the corner of Chew and Seventeenth streets you will see a fine building and you can say "That is our hospital and it is all paid for." But please do not forget that it takes money to run it, to support it, and it is doing an excellent work and the board will be pleased to receive any donations and help you can give them. When you make your will do not forget the hospital. Help it along.
