It’s Only 30 Minutes: Empowering Clinical Support Staff Through Nurturing and Education

Carol Sorrentino, MSN, PMHCNS-BC
Lehigh Valley Health Network, Allentown, Pennsylvania

Education Specialists at Lehigh Valley Health Network, Division of Education, committed to support the needs of their clinical support staff after witnessing an increase in turnover rates and mounting frustration to work harder and faster.

LVHN defines clinical support staff as a caregiver who directly and indirectly supports the RN in the delivery of patient care.

Program Goals
- Empower, nurture and educate
- Increase clinical competence, enhance personal and professional growth

Class Description
- Thirty minute sessions offered four times a month
- Multiple locations, all three shifts
- To include topics that enhance clinical skills, improve communication, reduce stress, and provide strategies for self-care & healthy work environment

What Can 30 Minutes Provide to Staff?
- Affirm importance of role
- Share experiences in a safe and nonjudgmental environment
- Acknowledge the need for care of self
- Practice communication skills
- Empower staff to recognize they have the ability to cope with multiple requests
- Discover creative options to handle stress when “everything seems urgent”
- Introduce mindfulness strategies for work and home
- Reinforce that clinical support staff are the foundation of quality patient care
- Guide staff toward healthier patterns of responding and to make better choices

What Can 30 Minutes Provide to Staff?

Outcomes
- 114 classes (March 2010 – March 2013)
- 877 participants attended
- Evaluation response rate 83%
- Overall satisfaction rate of 4.48 out of 5.00

Lessons Learned
- Need for research in this area
- Importance of role modeling
- Support of program by management
- Sharing experiences as important as the topic
- End each session with a “take home message”
- Always bring candy!!
